Subject: The astonishing truth about the fallen angel guide secret space program

This expose is about one of the most astounding yet evil projects the fallen angels have undertaken. First we will review some highlights and accomplishments of the project:

- 1 How long has this large evil project been running ?
 - 1.1 THIS VERY LARGE EVIL PROJECT HAS BEEN OPERATIONAL FOR 75 YEARS
- 2 Who has participated in the project ?
 - 2.1 TOTAL FALLEN ANGELS INVOLVED IN MANAGEMENT OF THE EFFORT: 500,000 LEGIONS
 - 2.2 TOTAL HYBRIDS INVOLVED: 10,000,000
 - 2.3 TOTAL HUMANS INVOLVED: 15,000,000
- 3 What countries are cooperating together in this project ?
 - 3.1 USA
 - 3.2 UK
 - 3.3 RUSSIA
- 4 What Planets does the project involve ?
 - 4.1 EARTH
 - 4.2 THE MOON
 - 4.3 MARS
- 5 What has been the cost of this project to date ?
 - 5.1 Total amount spent so far over the last 75 years is 150 trillion US dollars
- 6 How has it been financed ?
 - 6.1 KEY BACKING FOR THE LOANS TO PAY THIS OUTRAGEOUS AMOUNT OF MONEY WAS SWAPPING T-BILL FOR OIL AND GAS (BUYING ON CREDIT) THEN USING THE T-BILLS TO GENERATE MASSIVE LOANS (ALL OFF BALANCE SHEET) SO THAT NOW THERE IS AN AMOUNT OF 150 TRILLION US DOLLARS OWING WHICH HAS BEEN USED TO PAY FOR THE WHOLE MASSIVE PROJECT
- 7 Key transportation and logistics for this project:
 - 7.1 TOTAL TRAVELING CRAFTS INVOLVED 5,000 LARGE SHUTTLE/CARGO CRAFTS
 - 7.2 50,000 SMALLER CRAFTS
 - 7.3 TOTAL STARGATES MANUFACTURED JUST FOR THIS EFFORT 2,500

Even more astonishing than the sheer size of the effort is to understand why are the fallen angels undertaking this effort? After searching and hunting it was discovered that the primary pupose of this project is so that the fallen angels would be prepared for the outer space part of the Armageddon war.

Now we will take a look at the cost to earth and human life itself while accomplishing this project.

GOALS AND OBJECTIVES OF THE PROJECT AND THE COST IN HUMAN LIFE

While such a project may sound exciting and filled with glamor, because it is a project born in evil and for evil goals there have been some very large costs in human life to accomplish the goals and objectives of the project which we will state here.

- 1 The primary goal was to build a ring of defense around the earth so that the fallen angels could delay or stop the return of Jesus.
- 2 A major secondary goal was to more completely corrupt the human race and prepare and program them for the great deception.
- 3 One of the major objectives has been to spread the evil of LEGALIZED abortion to every corner of the planet, because once you accomplish the evil of diminishing life then the next step to becoming a cannibal is not a big step. And also if you can kill your own child then ritual sacrifice is another easy step to take.
- 4 If you wonder why I bring up all these facts (some of which are not directly related to the long running deeply secret space program) it is because when we understand the intent and the values of those running such a project then we can see the true value or danger of such a project.
- 5 In this case the goal of reaching outerspace is exciting to many people, but if they knew the true cost of the project would working on it be so exciting and fulfilling ?

WHAT HAVE SOME OF THE ACCOMPLISHMENTS OF THIS PROJECT BEEN SO FAR ?

Here is a list of highlights from this project:

- 1 In 1952 there was a joint flight to the dark side of the moon to plan the construction of the dark side moon bases.
- 2 In the time period of 1952 to 1961 there were 5 permanent moon bases built which have been used as staging areas as well as low gravity construction areas to speed up the development of the entire project.
 - 2.1 The area of each moon base is about 200 acres on the surface and about 150 acres per level under the surface for 7 levels.
 - 2.2 For a number of reasons the bases were all built on the dark side of the moon. Here are some of the primary reasons for building the bases on the dark side of the moon.
 - 2.2.1 To preserve security because anything built on the light side of the moon can be seen by anyone with a modest telescope or telephoto camera lens can see and record the activities around the bases.
 - 2.2.2 The dark side of the moon also shields the deep space radio and laser communications systems from the noise that the systems on earth create.
 - 2.3 The different sections of the bases are uniform in design and construction to make the job of construction and assembly simpler and more uniform.
 - 2.4 The living sections of the bases are laid out the same, and there is redundancy in the design. Here is what that means: A housing section has the following elements:
 - 2.4.1 A common meeting room
 - 2.4.2 A central storage area.
 - 2.4.3 A common kitchen
 - 2.4.4 Housing units with sleeping and bathroom area (much like a studio apartment on earth)
 - 2.4.5 There are also 2 bedroom housing units as well.
 - 2.4.6 Each common area accommodates 50 housing modules and this group of modules is securely airlocked from the rest of the areas of the base in the event of a breach of one of the walls or doors the entire base is not destroyed but only the part with the problem is affected.
 - 2.5 There are also the growing areas in which produce is grown as well as fish for protein and like all the other sections of the bases things are divided so that an air breach does not take down the whole section or whole base.
- 3 Discovery of ancient civilization of space travelers who used the moon as a staging area. From the data found this seems to have been a group of the grey hybrids who are known for driving and building many of the fallen angel crafts.
- 4 Also there are some ancient ruins mostly blown away by the sand blasting type effect when the atmosphere of Mars was stripped away. It appears that this was a pre-ademic culture of golden people and the fallen angels.

- 5 In 1962 there was a joint Soviet USA mission to Mars as an exploratory trip to plan for the bases which would be put there. Here is an image from that trip.

- 6 Another big accomplishment in the 1962 to 1974 time period was the development and installation of the first 4 large Mars bases.
- 7 One of the biggest things to deal with on Mars is the atmosphere and lack of protective magnetic field like Earth has.
- 7.1 The atmosphere of Mars is as follows:
- 7.1.1 Mars' atmosphere is over 100 times thinner than Earth's with an air pressure of only about 610 pascals (0.088 psi) which is less than 1% of the Earth's value
 - 7.1.2 95% carbon dioxide
 - 7.1.3 2.59% nitrogen
 - 7.1.4 1.94% argon
 - 7.1.5 0.161% oxygen
 - 7.1.6 0.058% carbon monoxide
- 8 Some of the interesting ground features:
- 8.1 Covering nearly a fifth the circumference of Mars, the canyon system Valles Marineris reigns as the largest canyon system on the Red Planet. Dwarfing its Earthly counterpart, the Grand Canyon, the Martian feature is one of the larger canyons in the solar system.
- Characteristics:
- 8.1.1 Valles Marineris is a system of canyons that spans 2,500 miles (4,000 kilometers). At some points, the canyon is 125 miles (200 km) wide. Regions can reach depths of 6 miles (10 km). If the system were located on Earth, it would stretch across the United States, from Los Angeles to the Atlantic coast.
 - 8.1.2
 - 8.1.3 By comparison, Earth's natural wonder, the Grand Canyon, is only 227 miles (446 km) long, 18 miles (30 km) wide, and 1 mile (1.6 km) deep. A windy channel on Venus, Baltis Valles, extends longer than the Martian system, as do a handful of rift valleys on Earth, which form along fault lines as the crust breaks apart.

9 The largest base is called “city of water” because its primary purpose is to extract water from the valley of waters on Mars as well as to be a primary landing site for construction materials as well as a people. This base has 5 active stargates which are constantly in use to speed the transit of entities and materials to and from the moon and earth.

9.1 Details of this base:

9.1.1 The total enclosed area of this base on the surface is about 1000 acres.

9.1.2 The underground part of the base has 7 levels each level is about 900 acres per level.

9.1.3 The bases on Mars all share a number of common design and construction features:

9.1.3.1 All emergency access tools and equipment are located in the same uniform location on each base.

9.1.3.2 On Mars even if it is not a “hard vacuum like it is on the moon, the very low pressure of the atmosphere will strip away all the water from your body if you are not wearing a protective suit.

9.1.4 Water on Mars is found encased in rocks so the water processing and recycling equipment is located on the lowest level of the bases.

10 Additionally there are 5 bases surrounding the city of water base which have huge defensive energy weapons designed precisely for the Armageddon war and to create (at least in the minds of the fallen angels) a barrier to slow down God’s heavenly host and the return of Jesus.

10.1 These 5 bases have the same layout because they are in fact on the surface large energy weapon bases and the underground portion of the bases is the energy source and support areas for each base. Again they are constructed from the same basic design and the surface portion of the bases is about 1000 acres and the underground portion is about 900 acres per level.

10.2 The different sections of the bases are uniform in design and construction to make the job of construction and assembly simpler and more uniform.

10.3 Each Master common area accommodates 50 housing modules and this group of modules is securely airlocked from the rest of the areas of the base in the event of a breach of one of the walls or doors the entire base is not destroyed but only the part with the problem is affected

10.4 The living sections of the bases are laid out the same, and there is redundancy in the design. Here is what that means: A housing section has the following elements:

10.4.1 A common meeting room

10.4.2 A central storage area.

10.4.3 A common kitchen

10.4.4 Housing units with sleeping and bathroom area (much like a studio apartment on earth)

10.4.5 There are also 2 bedroom housing units as well.

10.5 There are also the growing areas in which produce is grown as well as fish for protein and like all the other sections of the bases things are divided so that an air breach does not take down the whole section or whole base.

11 In addition there are of course the usual “science” type projects used to help entice people to come and work in the super secret world without telling the people about the evil involved.

EPILOGUE

Since China found out whispers of the large secret space program they have been trying very hard to prove that China deserves a place in this space program. Additionally China leadership decided they would try to replace the existing joint venture effort with an all China program and prove that China is very able to rule the earth. Yes the China space effort may sound exciting from the point of view of the technology growth and advances that China is making to achieve long distance space travel alone, but the key reason for doing the project is truly evil (TO RULE THE WORLD).
