Subject: A REPORT ON BIO-WEAPONS AND HOW THEY AFFECT YOU

This report is of vital importance to you because it shows that not just China has been involved in bio-weapons but the USA in a big way, yet the USA denies any connection to the design and manufacturing of bio-weapons. First let us look at the primary characteristics of a bio-weapon and categories of bio-weapons and what makes a virus or bacteria become a bio-weapon.

1 The most insidious type of bio-weapons:

1.1 The basic characteristics:

**1.1.1 They have a silent incubation period during which they are fully communicable and spread person to person.**

**1.1.2** They start with relatively minor symptoms and end up with deadly terminal symptoms.

**1.1.3 They have a wide range of ways they can be transmitted:**

1.1.3.1 In body fluids

1.1.3.2 In the air

1.1.3.3 In water

1.1.3.4 On surfaces

1.1.3.5 Via alternate hosts like insects

**1.1.4 They have an RO (Rate of infection) greater than 1 (meaning 1 person is fully capable to infect more than 1 other person.)**

**1.1.5 There is no known cure. (PLEASE NOTE: ALL THE EXPERIMENTAL COVID SHOTS HAVE NOT PROVEN THEY CAN PREVENT INFECTION OR CURE INFECTION OR PREVENT A SECOND CASE OF THE VIRUS IN A PERSON WHO SURVIVED ROUND 1 ILLNESS.)**

1.2 Examples of currently known and released bio-weapons and startling facts:

**1.2.1** Wuhan 2019: (my name for it, but known as covid-19). The **first important detail is that it is an adaptive multiphasic virus and no known “vaccine” will work against it because it adapts to changing condition. The RO is about 5 to 6, but one person in south korea infected 650 people. (simply by not knowing she had contracted the virus and the lady was in the silent incubation period.**

**1.2.2** Ebola 1. There are known cases in Pennsylvania and Tennessee. The RO so far is 8. At the terminal phase people drop dead bleeding from eyes ears mouth and nose (like exploding organs from inside exploding in the open). This designer virus was developed in an African lab using USA tax dollars to fund the work.

1.3 Examples of currently known and undergoing field trials bio-weapons and startling facts. This new category of bio-weapons combines the immune-suppressing characteristics of AIDS (which lets the viruses disable the bodies own white blood cell warriors which normally attack invading illnesses (bacteria or virus) ) and combine that with the “kill shot” meaning the part of the virus which poisons the body and kills it.

**1.3.1** AIDS + Wuhan 2019. This is COVID 19 on steroids so to speak and it is the aids part of the virus which shuts down the body's defense system. This virus comes from the wuhan lab in China.

**1.3.2** AIDS +Ebola 2. This is Ebola 1 on steroids so to speak and it is the aids part of the virus which shuts down the body's defense systemso that the body is unable to fight the virus.

1.4 Examples of upcoming bio-weapons which there are whispers about from different labs in the Ukraine.

**1.4.1 Haploid group specific Aids + Ebola. This virus is a race specific or group specific virus and it only infects people with the matching genetic markers in their DNA.**

**1.4.2 Haploid group carrier and a different haploid group host (victim) Aids + Ebola. This virus is a race specific or group specific virus and it only infects people with the matching genetic markers in their DNA.**

2 Other types of bio-weapons which are more rapid acting but equally deadly:

2.1 Anthrax

2.2 Plague

2.3 Modified smallpox

Now that you had a fast introduction to some characteristics of bio-weapons and some actual effects of them now we will talk about the why and who and what is happening related to bio-weapons and why it should matter to you no matter what part of the world you live in.

1 Who are the big sponsors of this type of evil development ?

1.1 USA – Currently the USA has funded wrld wide at least 1340 biolabs and NO LESS than 336 of the biolabs are biosecure level 4 biolabs in 30 countries and 36 in the Ukraine alone. Here are the long time significant biolabs in the USA There are 20 more being built:

1.1.1 Fort detrick army lab

1.1.2 CDC Atlanta

1.1.3 Center for Biodefence

1.1.4 Southwest Foundation

1.1.5 Rocky Mountain Laboratories

1.2 CHINA -Currently China has 3 visible Biosecurity level 4 labs and 12 more which they pretend do not exist.

1.3 IRAN – Currently Iran has 4 Biosecurity level 4 labs

1.4 NORTH KOREA Currently North Korea has 2 labs biosecurity level 4

1.5 UK – Currently the UK has 3 biosecurity level 4 labs

1.6 Ukraine (for themselves and the USA 36 we know of and there may be more.

1.7 Soviet Union – before the Soviet Union collapsed they had an intense bioweapons program. At the time of the collapse containers which held 12,000 gallons of a modified very active small pox in a form that was stable for storage but also ready to be used as an aerosol spray from a plane or from an ICBM warhead vanished. The man leading this

program Ken Alibek defected to the USA and got a job with one of the big defense contractors.

- 1.8 The current Russian Republic does in fact have a very active bioweapons program as well and they have 4 biosecurity level 4 labs (all hidden but they do exist).

What would you find in a well equipped lab:

- 1 Rooms with lower air pressure than the outside air so that any leaks would not cause the pathogens to escape into the normal air outside
- 2 The working boxes have lower air pressure than the lab itself so that any pathogens are confined to the working boxes.
- 3 Double air lock entry and exit.
- 4 Safe room for cleaning the protective suits and also the shower room for cleanup
- 5 24 hours 7 days a week cctv and live guard monitoring of the lab area.
- 6 All the normal things you find in a biology lab
- 7 a crisper system to cut and splice genes
- 8 an MRI system to check progress at the cell level in the host or in the colony

Here is a list of some existing level 4 pathogens which can be added to any bio-weapon but especially designer bio-weapons which you can order online. Just have your credit card handy and you to can have a designer virus biolab in no time at all

- 1 AIDS DNA group
- 2 Normal ebola group
- 3 small pox dna
- 4 flu dna
- 5 crisper tool

## EPILOG

Yes this is all real and not some conspiracy thing. The proof in fact is in how people are trying to hide the information which should be public information. **REMEMBER THIS: It is not some “warp speed” project costing billions which will save you. Only the precious blood of Jesus can protect you, heal you and save you. ALSO BE AWARE THAT ALL THE GOVERNMENTS ARE LYING TO YOU ABOUT ACTUAL DEATHS FROM THE VIRUS AND THE JABS. THE GLOBAL DEATHS FROM THE VIRUS AS WELL AS THE “SUPPOSED CURE VACCINES” IS ACTUALLY MEASURED IN THE HUNDREDS OF MILLIONS, WITH THIS NUMBER HARD TO PINPOINT BECAUSE OF ALL THE SECRECY AROUND THE DETAILS,**
