

Stargates and Portals and Magnetic Doorways

The purpose of this document is to provide some sound scientific information and details which give more of the normally yet deeply hidden available information regarding both “Stargates” as well as “Portals” which while viewed the same by most people are in fact NOT the same.

Some Basic Definitions

- For the sake of this presentation I am creating the following definitions so that my explanations are as precise as possible.
- A “Dimension” is defined as follows:
 - A Dimension is precisely defined as a parallel space time continuum which is fully contained just as is the space time continuum we live in and understand.
 - It is important to understand that the notion of time and distance and other things in each dimension can vary according to the rule-set of that dimension which does not need to match the definitions active in our dimension.
 - Unless an inter-dimensional Portal is opened nothing can move from dimension to dimension.

Some Basic Definitions

- A Stargate is a doorway which opens as follows:
 - It may open to any distance in the current “Dimension” of space.
 - While the Stargate is opened, it appears to the person walking or transiting the Stargate as if it was simply walking through an open doorway from one room to the next room. More details will be covered in this presentation to explain why some people have observed this as a more tunnel like thing at times than a simple doorway.

Some Basic Definitions

- A Portal is a doorway which opens in one of the following manners:
 - It may open to other “Dimensions”.
 - While the Portal is open it appears to the person as simply a doorway which is open between 2 rooms. More details will be covered in this presentation to explain why some people have observed this as a more tunnel like thing at times than a simple doorway.

Some Basic Definitions

- A Magnetic doorway is a doorway which opens as follows:
 - It opens as a short distance doorway in the current “Dimension” of space.
 - When a magnetic doorway is opened, it appears to the person walking or transiting the doorway as a hallway of short distance. More details will be covered in this presentation to explain why it behaves this way.

Magnetic Doorway

- I begin with the most simple of the doorways as well as an example of such a doorway which is expected to open soon.
- The magnetic doorway is like a “wall” (or jail door if you will) between the core of the earth (or any other such place like the core of the earth) which is a series of resonant RF cavities fueled by the heat stored there since the creation of earth.
- Inside some of the RF cavities are “abyss” or temporal jails binding untold numbers of demons who were commanded (per scriptural commands and God’s laws) to to to the abyss until the appointed time. These places are very hot (lakes of fire) is the correct translation “not a singular lake of fire” and they are eternal in nature as far as I have read and as far as the construction of them is understood the eternal nature of these “jails and energy cavities” is concerned.
- Note: a magnetic doorway does not in any way alter time it is a simple doorway.

Stargate

- A Stargate is a simple doorway between any 2 locations in the current dimension.
- A Stargate may be of almost any size with the primary penalty of a very large size is the energy required to hold open the Stargate that large:
- NOTE 1: The people who report that a Stargate opening is more like a tunnel in nature than a simple doorway are transiting through a Stargate of lower energy level than required to make it be a simple doorway going from room to room.
- Note 2: The energy required to hold open the Stargate is a function of distance and size with size being the largest part of the energy component.
- Note 3: Because of how the Stargate functions the pre-flood and post flood stargates until the year 1994 were NOT able to send live communications such as calls and data (like the internet does) all communications prior to that time were simple “foot net” (bringing the data with yourself).
- Note 4: Stargates are NOT systems/devices which allow the aspect of time to be altered as part of the open doorway between locations within the dimension.
- Note 5: The fundamental operation of a Stargate is to “fold space so that no physical laws or spiritual laws” are violated in the process.

Portal

- A Portal is a simple doorway (opening between known “Portal” locations in each dimension).
 - Note 1: If you wish to transit from any location in dimension 1 to any location in dimension 2 it is accomplished in a transparent means as follows:
 - Open a Stargate from where you are to a known Portal in your dimension.
 - Open the Portal to the desired dimension.
 - Open a second stargate in that dimension to the desired destination in the other dimension.
 - The whole process is transparent to the person or entity using the doorway.

Regarding Entities

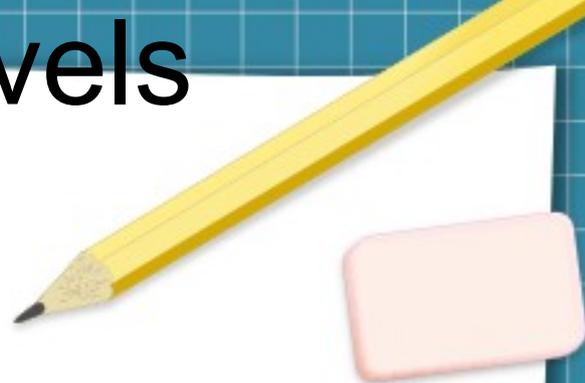

- An Angel or fallen Angel may only occupy a single location in any single dimension at one instant. (this limit applies to satan himself).
- While it is true that the fallen angels do their best to make people believe otherwise this is a core spiritual law which God will never allow to be violated.
- Angels and fallen Angels (like human souls) are eternal in nature.
- The Giants and other types of mixed entities are bound by the rules of their parents/ancestors per the rules of DNA.

Regarding Time and Parallel Existence

- Due to the spiritual laws which prevent an angel (fallen or not) or a human to be in 2 or more places at the same time this requirement precisely defines the limits of fully parallel space/time occupancy to God and God alone regardless of our best attempts to achieve this state.

Regarding Energy Levels

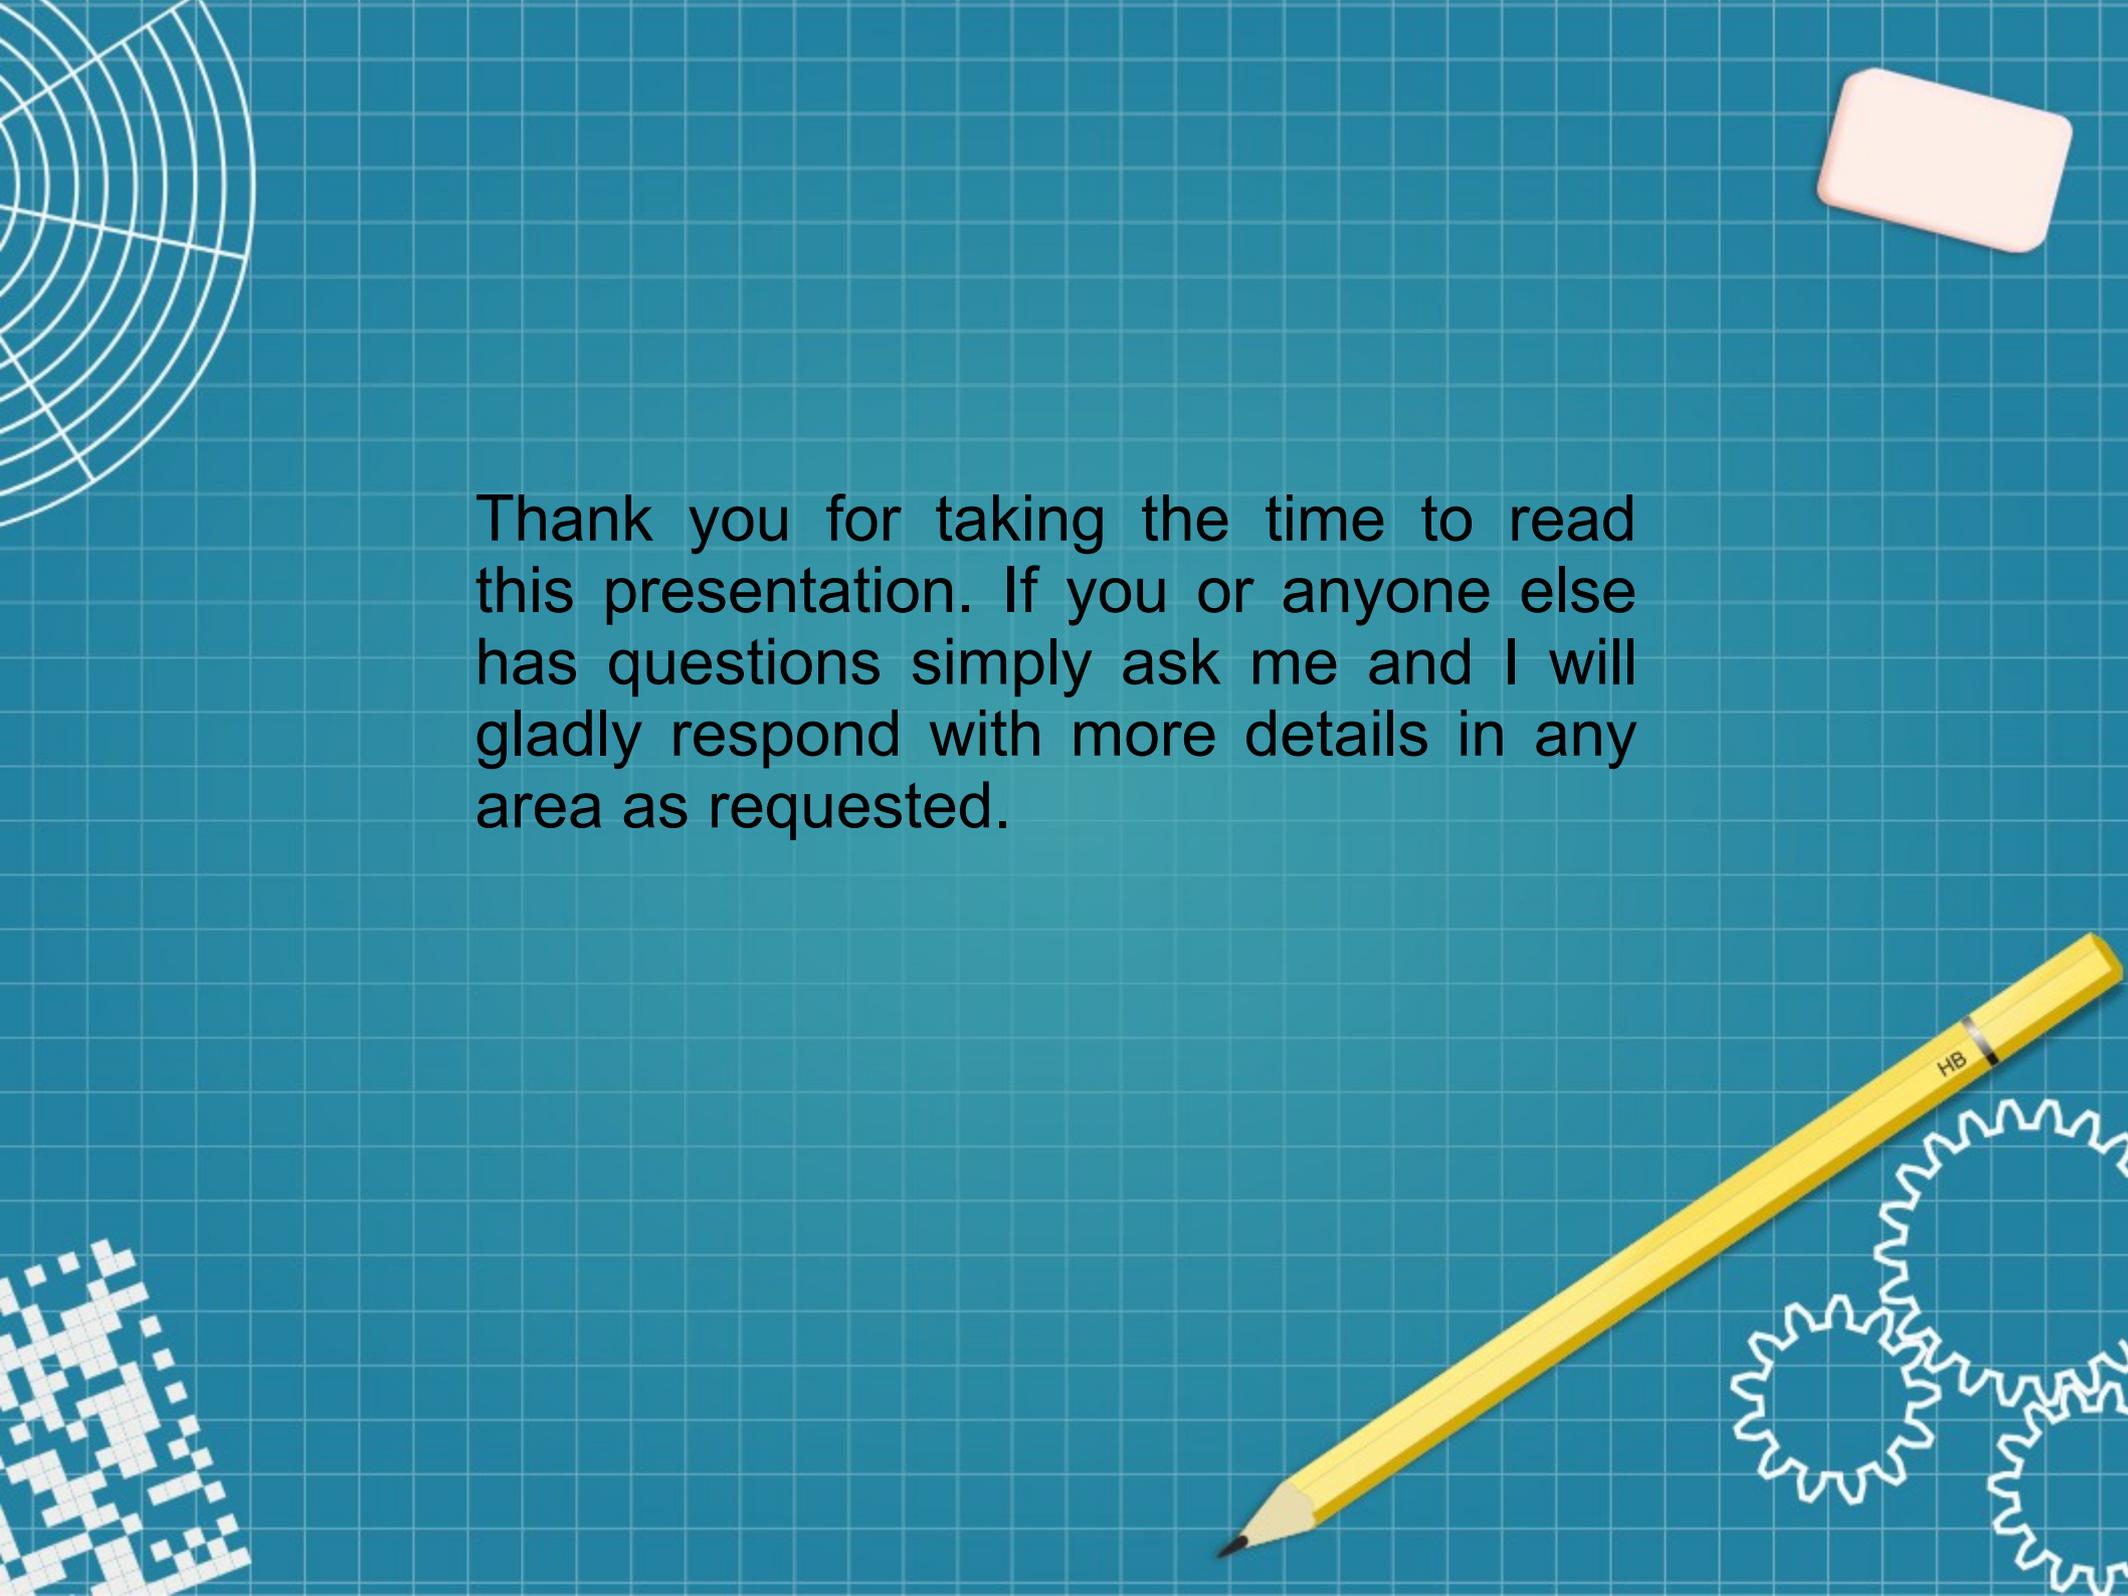

- The requirement for opening a magnetic doorway is the “ripping open” or collapse of the containment field of the plasma which is behind the magnetic doorway.
 - Note 1: One of the hidden secrets of all the fusion projects is to understand how to open and close under human control the magnetic doorways which guard the different RF cavities in the core of the earth. (for anyone who doubts it simply look who funds the efforts and their long term and short term goals.
- The requirement to open a Stargate to a “man size” (6 foot diameter) is 250 TEV. Both the voltage as well as the current have a significant bearing upon the size and shape of the “doorway” and its stability and behavior.
- The minimum requirement for an Inter-dimensional Portal is in excess of 600 TEV for a “man size” (6 foot diameter) doorway.
- The tunneling effects are due to the stability of the energy system on both sides of the Stargate or Inter-dimensional Portal.

Significant Stargates and Portals

- Antarctica:
 - A large stargate located on Maude Island. First found by the Nazi's in 1938 on a trip there seeking occult weapons etc.
 - There are 5 stargates in the primary throne room on earth of satan:
 - 1 right next to his throne
 - 4 more large stargates spread out through the main hall which is about 36,000 Hectares in size.

Thank you for taking the time to read this presentation. If you or anyone else has questions simply ask me and I will gladly respond with more details in any area as requested.
