Subject: REPORT PSYCHOTRONIC WARFARE AND 5G
PUTTING FALSE THOUGHTS IN PEOPLES HEAD WITH 5G RF AND INFRASOUND!

One of the most deadly forms of warfare is psychotronic warfare. It is the most deadly for of warfare because it does not kill you but it can put voices in your head and it can also put intense pain directed at any place in your body. On a battlefield the soldiers of the other side will be helpless to fight against you. Closer to home this type of warfare can take control of your body for a while and make you defenseless for a period of time.

How is this accomplished ? Well let us dive into the science of this type of warfare. There are 2 basic ways which any of the frequency bands can affect the body, first is a direct unmodulated signal and the second way is a modulated signal:

- 1 Early efforts with infrasound: Infrasound is sound waves in the range of 17Hz to 0.01 Hz that are known to have direct effects on the human body.
 - 1.1 Infrasound is capable of the following direct effects in the body:
 - 1.1.1 Unmodulated infrasound signals can induce any of the following effects:
 - 1.1.1.1 Loss of control of basic body functions.
 - 1.1.1.2 At higher power levels intense pain is the result.
 - 1.2 Infrasound is capable of the following indirect effects in the body:
 - 1.2.1 Modulated infrasound signals can induce any of the following effects:
 - 1.2.1.1 unwanted motion in the limbs.
 - 1.2.1.2 Twitching of the fingers and toes
- 2 Early efforts with ELF RF: Extra low frequency RF can also induce things in the human body.
 - 2.1 ELF RF is capable of the following direct effects in the body:
 - 2.1.1 ELF can heat portions of the body and cause intense pain.
 - 2.2 ELF RF is capable of the following indirect effects in the body:
 - 2.2.1 Modulated ELF RF can induce sounds in your head.
 - 2.2.2 Modulated ELF RF can also induce control over your body and make you behave like a puppet.
- 3 Efforts with microwaves in particular 5G cellphone towers: Microwaves also can induce things in the human body.
 - 3.1 Microwaves are capable of the following direct effects in the body:
 - 3.1.1 Unmodulated high intensity microwaves can cause skin burns and body trauma
 - 3.2 Microwaves are capable of the following indirect effects in the body:
 - 3.2.1 Modulated microwaves can induce audio sounds directly into the brain making people hear things which they think are real around them but in fact were only broadcast to their brain.
 - 3.2.2 Modulated microwaves can also cause the body to behave like a puppet under the control of the person who is controlling the signal source.

HOW TO DEFEND YOURSELF EFFECTIVELY

How to defend yourself;

- 1 Do not get the vax shots.
 - 1.1 A vax shot will enable more sensitivity in your body.
 - 1.2 Also a vax shot marks you with a serial number.
- 2 Some important details you need to be aware of is that 5G is **NOT** single frequency but a group of frequencies assigned to high performance cell phone work. A 5G phone or transmitter can jump around the frequencies as needed.
- 3 Intense microwave beams modulated as defined below can have the following effects:
 - 3.1 Modulation of 30 Hz or 60 Hz can agitate people to the point of intense anger.
 - 3.2 Modulation of 15 Hz or 45 Hz begins to put people to sleep
- 4 The best defense from a 5G attack is to not go to stadiums or places where large numbers of people go because that is where you will find the most intense 5G signals.
